THE FUTURE OF THE FLUSH MOUNT ROD HOLDER HAS ARRIVED

The EVO-360 rotating rod holders are more of a revolution than an evolution.

They completely revolutionise the conventional flush mount rod holder that bind you to a fixed rod position with no ability to adapt to environmental factors that can affect your rod and reel at any time while fishing.

These are the 30-degree, 15-degree and 0-degree models, with 8½" tube lengths, the rotating rod holders are a mirror polished full stainless rod holder rated to 135lb tackle they cover most general fishing needs for a regular straight stock rod and curve butt rod to allow the fine-tuning of a position for trolling under outriggers or live bait and bottom fishing or even kite fishing.

5 year manufacturers warranty.
